Thank you for visiting what we hope will become the premier one stop FREE site to download your next windows mobile 6 software for your cell phone or PDA. As leaked roms of windows mobile 6 get distributed around the net, we took it upon ourselves to build a site that consolidates a lot of the developed software that actually is being explicitly made for WM6. We're not just fans of Windows Mobile 6, we also run a very successful FREE windows mobile 5 software download site as well, for the Cingular 8525. www.8525software.com

We took the experiences and knowledge that we gained working on that site and applied the same style here. We learned from all of you that people LOVE to have one place to go to download free software for their cell phones and pdas. We also learned that people do NOT want annoying pop ups or hard to navigate (IE Cluttered) websites. What you see here before you is the easy way to get what you need and want.

We ask that you guys spread the word about www.wm6software.com Tell all the developers working on cell phone apps that this will be a centralized FREE hub for their software distribution. We know that there will always be paid sites to purchase commercial software packages, but we know that you love the free stuff too.

So thank you for visiting and enjoy the site, for as windows mobile 6 is launched for cell phones everywhere, we hope that you get all the benefit you can from our site.

WM6Software Features:

- Easy to navigate website
- No annoying pop-ups
- Free software (and themes!)
- Support forums to talk about issues and software
- Request area to have others help you find what you need
- Did I say free software?
- News, notes and rumors about windows mobile 6 and the cell phones that run it
